Natural.
Comfortable.
Sleep.

DreamStation supports long-term patient use while creating new efficiencies for your business

Powerful patient-driven design

DreamStation was designed with feedback from hundreds of patients to provide a simpler PAP experience to help both new and experienced patients use therapy long-term. A suite of intuitive tools can be customized by healthcare professionals to choose the solution that's right for each patient.

Acclimating patients in the early days of therapy

EZ-Start can help patients gradually adapt to their prescribed level of therapy using an innovative pressure acclimation algorithm with automatic, personalized adjustments to PAP pressure over the first 30 days.**

SmartRamp allows users to fall asleep to lower pressures than standard ramp mode. The air pressure remains low until the patient experiences an obstructive respiratory event. Then SmartRamp responds with an auto algorithm to resolve the patient's apneas.**

Make progress every day

Each morning patients are greeted with Daily Progress Feedback — a summary of how far they've come to motivate them to stick with their therapy. The intuitive, color display shows a simple trend of their nightly hours of use, followed by a summary of their last 30 days of good nights with more than four hours of use.

Sleep therapy success* at your patients' fingertips

Bluetooth® is included in every DreamStation device for easy connectivity to the DreamMapper patient self-management tool. DreamMapper helps patients take an active role in their sleep management by providing daily therapy progress, helpful troubleshooting videos, and goal-setting tools. Patients can stay engaged and get the information they need fast, without having to use your staff's time to resolve common issues.

An Encore performance

DreamStation connects to our powerful EncoreAnywhere patient compliance management software. EncoreAnywhere is HIPAA compliant and makes it easy and efficient for sleep professionals to manage patient compliance and therapy.

Focus your time where it belongs

EncoreAnywhere features Adherence Profiler. It's an optional, intuitive tool that helps you identify patients according to their probability of achieving adherence, helping focus your staff's time on the patients that have the greatest likelihood of success.

Creating efficiencies
that make a difference

Simplify device evaluation

Performance Check simplifies in-home device evaluation for easy remote troubleshooting. Designed to reduce the time and frustration involved in device troubleshooting, this robust tool allows you to guide the patient through an easy remote diagnosis, resulting in a simple "Pass/Fail" result to determine if the device needs to be returned for service.

Performance Check can also generate a report in our EncoreAnywhere patient management software tool, allowing you to troubleshoot patient concerns.

According to our research, 25% of returned devices are found to be operating normally. Performance Check is designed to help reduce the number of normally functioning devices that are returned for service, saving you time and delivery costs.

Reduce manual adjustments

DreamStation can automatically adjust to changing patient needs, helping reduce costly home visits and letting you focus your attention where it needs to be.

✓ **CPAP-Check**
Checks on the user every 30 hours to determine if CPAP pressure is optimal. If not, it automatically adjusts to meet changing patient needs.**

✓ **Auto-Trial**
Delivers breath-by-breath auto-CPAP therapy for up to a total 30 days per patient. Transitions to CPAP or CPAP-Check mode at end of Auto-Trial.**

✓ **Opti-Start**
Provides optimal starting pressure that can enhance patient comfort and reduce the likelihood of residual events at the beginning of therapy.**

*Philips research, 2015, data on file.
**Not available in all DreamStation PAP models and modes.

More cost-effective
connectivity options

Only DreamStation offers Bluetooth® Cellular and Wi-Fi® connectivity options. By providing the most comprehensive suite of connectivity choices among leading PAP brands*, you can choose the options that are most cost effective. DreamStation's innovative design has the capability to adapt as technologies continue to advance.
Making it easy to reach your patients
- Cellular provides daily data to clinicians and one hour after the patient has turned the device off
- Wi-Fi delivers more data to clinicians more often and provides coverage even in weak cellular areas
- Bluetooth is included in every device for easy connectivity with DreamMapper and Alice NightOne

*Internal assessment of 2015 competitive CPAP data comparing to ResMed Airsense10/Aircurve10 platform and Fisher & Paykel Icon series platform.

DreamMapper helps patients take an **active role** in their therapy

With the DreamMapper self-management tool, patients can use the mobile and web-based features to engage with their therapy.

Sync devices
Data is easily synced and available through smartphones, tablets, or computer

Track progress
Patients can monitor the progress of custom goals they set for themselves

View data
Patients can see their therapy data quickly and easily

Set reminders
Patients can set reminders for important tasks, including mask, tube and filter cleaning

Troubleshoot
Troubleshoot common problems

Inspire patients
Tools to help encourage adherence

The **performance and appeal** patients want

DreamStation offers a sleek, low-profile design. Its vibrant color screen displays daily progress and features easy-to-use menus.

Dreamstation's top-mounted humidifier hose swivel and front-facing display make it easy for patients to operate while lying down or sitting up in bed. And, it's small and light, making it easy to pack for travel.

30% smaller
The DreamStation PAP is 30% smaller than the Airsense10 PAP.*†

39% lighter
The DreamStation PAP is 39% lighter than the Airsense10 PAP.*†

63% quieter
The DreamStation PAP is 63% quieter than ResMed Airsense10.**†

Hear it from **DreamStation users**

Good-looking piece of equipment! It's modern looking, doesn't look like a medical machine. It's quieter, too.

I liked it as soon as I opened it! I liked the way it was laid out and I liked the size of it — it was small, easy to fit on a table along with a lamp and my phone.

*Philips internal comparison, 2015, data on file.
**Based on the average change in sound level during simulated patient breathing, across a range of pressure, expiratory relief, and humidifier conditions.
†Does not apply to non-invasive ventilation products

Advanced therapies

DreamStation ventilation solutions use clinically proven algorithms that support customized, connected care for patients who require advanced therapy. DreamStation BiPAP autoSV, BiPAP AVAPS, and BiPAP S/T options are designed to offer exceptional comfort, intelligent monitoring, and seamless connectivity between patients and care teams.

Call **1-800-345-6443** or visit **www.philips.com/dreamstation** for more information.

BiPAP autoSV***

*Used with flow generator only. Cannot be used with a humidifier.
**Includes a rechargeable lithium ion battery pack, a PAP device cable, and a battery case.
***Black face plate only available with DreamStation BiPAP auto SV, BiPAP AVAPS, and BiPAP S/T options.
